Synchrony scope for phase comparison for three phase AC circuits

- Model.PM-96
- Voltage:110V 220V 380V 440V
- Working time:15min max.
- Freq: 50Hz or 60Hz

96 x 96 x 130mm

Electronic synchronoscopes

- Consumption: 3VA
- Supply voltage (line/generator): 380Vac+20%-40% standard
- These instruments indicate the synchronism condition when the green LED placed under the arrow in the centre of the dial is lit with a fixed light, and the two yellow phase indication leds are off. The lighting up of the red leds in a clockwise or anti clockwise sequence indicates that the generator to synchronize is fast or slow regarding the line. If the phase indication LED flashes this means that the generator voltage to synchronize is not present.
- PM-96 380V synchronoscope with 380/50Hz supply voltage

Sequence indicator

This indicator is designed for easy testing of phase sequence in three-phase systems with a permissible operating voltage up to 500V. For short connections, not longer than 5 minutes for one test, a push-button switch is placed on the front plate. A disc with an indicating arrow rotates in the direction of the arrow, if the three phases are properly connected, otherwise the disc rotates in the other direction. By changing of two wires, the phase sequence will be corrected to corresponding designation of the terminals.

- Model:PM-SI96 PM-SI72
- Voltage:110-500V
- Working time:not longer than 5 minutes.

Interchangeable scale

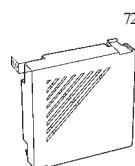

- The scales of the instruments in this catalogue are conform to the DIN 43802 standards.
- The instruments for use by means of a C.T. or Shunt can have interchangeable scales and are made in such a way that it is impossible to touch the indicator or damage the mechanism while the change is carried out.
- Shift the lid placed on the upper part of the instrument in the direction of the arrows to obtain access to the aperture; After each operation, close the lid accurately to totally close the aperture.
- Important warning: the instrument should not be connected into the supply when the scale is replaced.
